### Our Services

Southwest PCB Design, Inc. is a leading provider of technology services for government agencies and private industry. We offer a full range of customized Printed Circuit Board (PCB) layout, design, fabrication, assembly, and testing services that address the demanding requirements of modern electronics systems. Our broad range of services fully encompasses customers' needs from initial concept, design, and development through production.

By using Rapid Prototype processes that were developed to allow the military aerospace industry to quickly design and implement prototype designs, we are able to offer a fast, low-cost solution for new design development, and for updating existing designs. We also provide cutting edge solutions to legacy re-designs.

We provide a number of services for delivery of high quality electronic system solutions. These services include:

- Printed Circuit Board Layout & Design*
- Printed Circuit Board Fabrication*
- Printed Circuit Board Assembly*
- Mechanical Design*
- Embedded Software Programming*
- Database Programming*
- End-of-Life Component Solutions*

### Our Strategic Technologies

We believe in maintaining a balance between leading edge technologies and proven technologies.

Our development technologies are based on industry leading tools.

- Protel Design Suite*
- AutoCAD*
- Visual Basic Development Tools*

### Why Use Southwest PCB Design?

We have a proven track record of delivering solutions to complex technical problems. Our clients range from National Laboratories to Blue Chip organizations across a variety of industry sectors, nation wide.

At Southwest PCB Design we feel it is important to build a close working relationship with clients. Furthermore we believe concurrency of knowledge, skills and personnel throughout a project cycle is key.

*We speed up the development cycle for projects, which allows you to get products to your customers quickly.*

### What Can You Expect From Us?

To ensure the success of any project we feel it is necessary to develop a good working relationship with our clients. From project inception to the final delivery of the service, you will interact with the same key professionals.

If the project requires third party specialist involvement, we will undertake all liaison on your behalf. Our key technology partnerships allow us to use specialists as required.

We will always offer impartial, independent recommendations, and will strive to offer a number of alternative solutions to your requirements.

### Partnerships

Our expertise is backed with strong partnerships with leading companies.

Southwest PCB Design's partners play an important role in ensuring that we can deliver a full range of professional services to our clients.
